

Belshifa

(Medicine Ordering application)

Belshifa is a free medicine ordering application that let you get the medicine or any healthcare products and cosmetics you need in a fastest and simplest way from the nearest pharmacy by searching through medical database. It's a complete medical platform where user can find sections of different pharmaceutical products.

This application offers medicine patient info like indication, usage, side effects, precautions, drug-drug, and drug-food interaction. Patient can Know the prices of each medicine.

Pharmacists can also use Belshifa application as a pharmacy gateway to receive all orders from patients. Pharmacists just need to login to pharmacy account, then receive notifications whenever there is a new order waiting to be fulfilled. Pharmacists can pick order and send invoice to patient that have requested this order. Once the user confirm the invoice, the pharmacy can send the order to patient address.
